The Background:

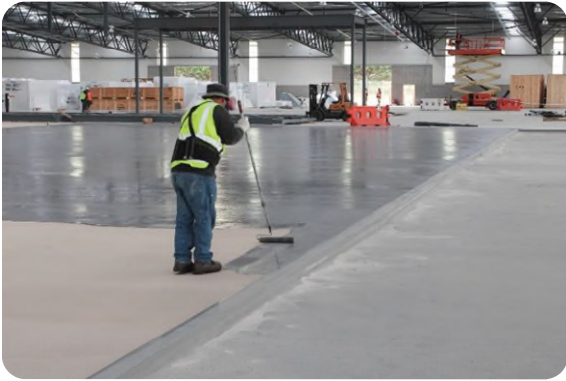

Lion Nathan's brewery is situated on a 16.7 hectare site in South Auckland. It is the 'home' of many of New Zealand's top-selling beers including Steinlager, Speight's, Mac's, Lion Red, Stella Artois, Corona, Guinness and Wither Hills.

The Challenge:

The new brewery was commonly referred to as Project Century - in reference to the facility's projected life-span of 100 years. The facility was developed with a focus on quality, long-term performance and reduced environmental impact. The focus was also applied to the floors, and the challenge was to find a floor that could meet performance expectations and be non-slip, non-tainting, non-dusting, microbiologically inert and easy to clean.

Lion Nathan East Tamaki Brewery

Ucrete DP

Application of Ucrete DP in the beer processing area and packaging room

Our Solution:

Project engineers Beca chose Ucrete DP for the beer processing, packaging and warehousing areas. Lion Nathan had previously installed Ucrete DP floors in its Christchurch facility and the performance of these floors, together with its performance in other facilities made Ucrete DP an obvious solution.

The Customer's Benefit:

- Quality, toughness, longevity and ease of cleaning were of paramount importance. Ucrete DP delivered outstanding performance on all metrics.
- Ucrete DP offers exceptional resistance to aggressive chemicals, heavy impact and temperatures from 40°C to 120°C.
- Speed of application - it was applied to a shot-blasted concrete floor slab at a thickness of 5 – 6mm. This was followed by broadcasting non-slip aggregate and a final roller coat application of the Ucrete topcoat.

Project Facts at a Glance

- 6,000m² of Ucrete installed at East Tamaki, including 1,200m² in the beer processing area and 3,500m² in the packaging room.
- With a crew of 12, Topcoat Specialist Coatings laid the 3,500m² packaging room floor in 5 days.
- The floor's short curing time enabled foot traffic after 8 hours, and vehicular traffic after 24 hours.

Master Builders Solutions

Master Builders Solutions is a leading global manufacturer of concrete admixtures, as well as other sustainable solutions for the construction industry, focused on delivering its vision: Inspiring people to build better. Master Builders Solutions provides value-added technology and market-leading R&D capabilities to improve the performance of construction materials and to enable the reduction of CO₂ emissions in the production of concrete. Founded in 1909, Master Builders Solutions has more than 1,600 employees and 35 production sites globally with over 150 employees and 6 production sites operating across Australia and New Zealand. Master Builders Solutions supports its customers in mastering their building challenges of today – for a decarbonised future.
