MasterKure® 101

Acrylic, water-based, concrete curing compound

DESCRIPTION OF PRODUCT
Masterkure 101 is a solvent-free, acrylic, water-based emulsion, suitable for spray application to freshly poured concrete.

The resultant film retains sufficient moisture in the concrete to ensure full hydration of the cement; essential for optimum strength development. Membrane-cured concrete is typically harder and exhibits a dust-free surface with a reduced incidence of drying shrinkage cracks.

PRIMARY USES
As a more effective and economical alternative to Hessian, water and polythene curing regimes. Suitable for use on all concrete surfaces.

ADVANTAGES
- Eliminates the need for water
- Single application
- Reduces drying shrinkage
- High curing efficiency
- Reduced labour costs
- Water-based

PACKAGING
Masterkure 101 is available in 210ltr drums.

TYPICAL PROPERTIES

STANDARDS
Masterkure 101 meets the requirements of ASTM C309 Type 1 Class B

COVERAGE
The recommended rate of application is 0.22ltr/m². This corresponds to that at which Masterkure 101 has been tested, and at which it attains the claimed degree of curing efficiency. In favorable conditions, such as shaded interior surfaces, adequate curing can be achieved with extended coverage rates.

SUBSEQUENT SURFACE FINISHES
Cement renders can be applied directly over Masterkure 101 cured surfaces providing it is ensured there is no surface laitance, dirt, oil or grease on the surface. Surfaces must be well cleaned if they are left for long periods unprotected.

MasterCast bonding slurries must be utilized to bond subsequent finishes. Please refer to Master Builders Solutions’s Technical Services Department for approved mix designs. If renders of greater thickness than 1cm are to be applied, bond tests should be carried out to determine the proposed bonding method and surface preparation that is required. For floor areas appropriate surface preparation is required dependant on the type of floor finish being applied. Please refer to Master Builders Solutions technical department for appropriate recommendation.

SPECIFICATION CLAUSE MASTERKURE 101

Where indicated, concrete shall be cured by application of Masterkure 101, acrylic-based emulsion manufactured by Master Builders Solutions Egypt or similar approved; to the following specification:

SPECIFICATION TYPE:
ASTM C309: Type 1 Class B
Masterkure 101 is to be applied strictly in accordance with the manufacturer’s instructions.
STORAGE
Shelf life is up to 1 year when stored under cover, out of
direct sunlight and protected from extremes of
temperature.

HEALTH AND SAFETY
As with all chemical products, care should be taken,
during use and storage, to avoid contact with eyes,
mouth, skin and foodstuffs. Treat splashes to eyes and
skin immediately. If accidentally ingested, seek medical
attention. Re-seal containers after use. Use in well-
ventilated areas and avoid inhalation.

NOTE
Field service, where provided, does not constitute
supervisory responsibility. For additional information,
contact your local Master Builders Solutions
representative.

Master Builders Solutions reserves the right to have the
ture cause of any difficulty determined by accepted test
methods.

QUALITY STATEMENT
All products manufactured by Master Builders Solutions
Egypt, or imported from Master Builders Solutions
affiliate companies world-wide, are manufactured to
procedures certified to conform to the quality,
environment, health & safety management systems
described in the ISO 9001:2015, ISO 14001:2015 &
OHSAS 18001:2007 standards.
