

Project:

Hogsmill Sewage Treatment Works

Location:

London

Owner/s:

Thames Water

Applicator/Contractor:

GBM Alliance

Designer/Architect/Specifier:

Montgomery Watson Harza

Market sector:

Water Management Industry

Products used

MasterEmaco N 5200

MasterEmaco S 5450 PG

MasterTop P660

MasterSeal M 689

Sales contact:

Darren.priddle@basf.com

Hogsmill Sewage Treatment Works, London Refurbishment of Primary Settlement Tanks

Our reference in London (United Kingdom): Hogsmill Sewage Treatment Works

The background

This project involved the encapsulation of two primary settlement tanks within “bio domes” in order to reduce odours in the surrounding residential area and harvest the methane produced.

The challenge

The refurbishment programme involved the removal by hydro demolition of a cantilevered rim of concrete, the repair and re-profiling of the concrete surface to falls as necessary and the installation of a new concrete link bridge within each tank. The effect of encapsulating the tanks increased the microbiological activity and subsequent acidity within the atmosphere. A suitable coating was required to protect the concrete from the new environmental conditions.

Refurbishment of Primary Settlement Tanks

Our reference in London (United Kingdom): Hogsmill Sewage Treatment Works

Our solution

MasterEmaco N 5200 was used to repair and re-profile the concrete surface. A shutter was constructed to form a level top surface and internal falls. MasterEmaco S 5450 PG was poured into the shutter to cast a level surface onto which the “bio dome” was secured. The internal falls were designed to prevent the ponding of acidic solutions within the encapsulated tank. The internal surface of the tanks were primed with MasterTop P660, sand-blinded with F1 filler. After 24 hours, the internal concrete surface was sprayed with MasterSeal M 689 rapid-setting, chemically resistant polyurea coating to a thickness of 1.5 mm in one coat. The coating was applied to a height of 3 metres, from the top of the tank to approximately 1 metre below the minimum fill level in service.

The customer's benefit

- MasterEmaco N 5200 rapid-setting mortar enabled the re-profiled surface to be sufficiently cured within 7 days to receive the coating.
- The combination of MasterTop P660 primer and MasterSeal M 689 coating ensured a rapid installation and return to service of the applied coating.

Projects facts at a glance

- Concrete repair and coating of two primary settlement tanks.
- Re-profiled surface sufficiently cured within 7 days thanks to MasterEmaco N 5200 rapid-setting mortar.
- Rapid installation and return to service of the applied coating thanks to the combination of MasterTop P660 primer and MasterSeal M 689 coating.

Master Builders Solutions from BASF

The Master Builders Solutions brand brings all of BASF's expertise together to create chemical solutions for the new construction, maintenance, repair and renovation of structures. Master Builders Solutions is built on the experience gained from more than a century in the construction industry.

The know-how and experience of a global community of BASF construction experts form the core of Master Builders Solutions. We combine the right elements from our portfolio to solve your specific construction challenges. We collaborate across areas of expertise and regions and draw on the experience gained from countless construction projects worldwide. We leverage global BASF technologies, as well as our in-depth knowledge of local building needs, to develop innovations that help make you more successful and drive sustainable construction.

The comprehensive portfolio under the Master Builders Solutions brand encompasses concrete admixtures, cement additives, chemical solutions for underground construction, waterproofing solutions, sealants, concrete repair & protection solutions, performance grouts, performance flooring solutions.
