

CORMART CHICKEN HATCHERY. Ogun State, Nigeria.

Project:
Cormart Ajanla Project

Location:
Ogun State, Nigeria

Project completion:
2014

Owner/s:
Cormart Limited

Applicator/Contractor:
Cretech Global

Market sector:
Performance Flooring

Products used:
Ucrete UD200

Our reference Ogun (Nigeria): Cormart Factory

The background

A new cold room in the poultry farm, located in Ogun State along the Lagos – Ibadan Express way required a durable flooring solution to handle temperatures as low as -40°C. Being very familiar with the performance of the Ucrete system because of the success stories in other Cormart Ltd food and beverage production facilities, the client selected Ucrete MF

The challenge

- On-site material application temperature needed strict control due to high ambient temperatures (between 30 - 34°C)
- Tight project timeline to be met
- Intricate project execution requirements and collaboration with rest of Guinness production and engineering teams

Our solution

Master Builders Solution proposed Ucrete MF flooring system to match the specification requirements for a heavy duty and chemical resistant floor with a smooth, matt finish. A trained and certified flooring applicator was introduced by Master Builders Solution to reduce application issues and any potential project completion delays.

Customers Benefit

- Being able to provide a hard wearing floor.
- Fast curing system to prevent delays in installation of equipment.
- Master Builders Solutions product applied by a Master Builders Solutions trained applicator.
