

MasterColor 100

Powder dyes based on mineral oxides for the production of cement-based products.

Description and Where to Use

MasterColor 100 is a line of mineral oxide-based powder dyes, for the processing and production of cement-based products. The products of the MasterColor 100 line are listed in the table below:

Product	Density (g/ml)
Red	4.9 – 5.1
Red Brown	4.9 – 5.1
Brown	4.9 – 5.1
Jellow	4.0 – 4.3
Orange	4.0 – 4.3
Black	4.7 – 5.0

The MasterColor 100 line can be used in ready-mix architectural, in prefabricated structures and for the construction of wet earth concrete products. Compliant with EN 12878.

The use of MasterColor 100 is recommended for:

- paving and areas of urban or private traffic (pedestrian areas, squares, parking areas, sidewalks, external stairs, private or condominium outdoor flooring, garage slides, etc.),
- production of elements for gardening and urban furniture with exposed aggregates,
- architectural concrete.

Directions for use

The homogeneity of the color in the colored concrete depends on the homogeneity of the dispersion of the dye itself. It is advisable to mix aggregates and colorant well and then to add cement and water to the mix.

The coloring in concrete depends on:

- dosage of colored oxide,
- cement dosage,
- staining of concrete,
- nature and quantity of fines deriving from sands,
- water – cement ratio.

It is advisable to carry out test mixes to study and fine-tune the desired color of the final product. Furthermore, the color may vary during the early ages curing period.

Compatibility

When preparing concrete with MasterColor 100, it is recommended to use:

- high efficiency water reducing additive from the MasterGlenium, MasterEase, MasterSure line.

Dosage

The dosage can vary from 0.5 to 6% by weight on the weight of the cement.

Packaging and storage

MasterColor 100 dyes are available in 25 kg paper bags for red, brown, black, and 20 kg for orange and yellow.

Once the package has been opened, it is advisable to keep the contents in a dry place. In closed package and dry place, MasterColor 100 have no expiry date.

MasterColor 100

Powder dyes based on mineral oxides for the production of cement-based products.

Handling and transportation

No special precautions are required when using MasterColor 100.

However, the use of gloves, mask and protective goggles are very recommended. For more information, consult the Master Builders Solutions area technician.
